

INTERIOR CONSTRUCTION PROJECT DESIGNER

GL Seaman & Company is a leading contract furniture dealership in Dallas. We create beautiful workspaces. We provide extraordinary service to our clients, and we believe in hiring the best talent. We are seeking experienced designers and/or new graduates aligned with the preferred qualifications to join our Interior Construction team.

The Project Designers for our Interior Construction division have the opportunity to be a part of something innovative and revolutionary. A DIRTТ Project Designer is part engineer, part computer tech wizard and part visionary. They will take our clients' needs and ideas and guide them from concept to factory order, using their strong design background and pushing cutting-edge software tools to the limit in the name of building better client solutions.

In this role, the Project Designer will apply their creative expertise and design services to support new and existing customers. They will practice high standards for design concepts and they will produce stellar results. The discipline to work individually, yet also engage with an energetic team is a must. The Designer must be able to handle and successfully juggle multiple priorities with sometimes pressing deadlines.

Position Highlights:

- Responsible for the overall specifications relevant to project scope
- Learn and master ICE® software to produce renderings, files, scope plan, quote packages and shop drawings
- Demonstrate excellent time management skills and flexibility; effectively and confidently addressing competing priorities and deadlines
- Actively participate in team project review meetings and strategy sessions
- Be an effective communicator, not afraid to ask questions to gather missing information
- Attend site visits as needed for client meetings or to verify field dimensions
- Become a subject matter expert in DIRTТ, dedicated to continuously expanding product knowledge

Preferred Qualifications:

- Associate's or Bachelor's degree in Architecture, Industrial Design or Construction Science
- Experience with CAD or other 3D software a plus
- Previous knowledge of DIRTТ products and solutions an asset
- Familiarity with all phases of interior construction planning is beneficial
- Understanding of interior construction including architectural elements, lighting, electrical, HVAC and basic base-building knowledge
- Previous experience working in an architecture and/or interiors firm helpful
